Re: SC Public Service Commission Docket 2005-385-E Order No. 2006-680

Dear Commissioners:

This is to urge the SC Public Service Commission to offer net metering to residential customers as well as commercial customers. I specifically request the SCPSC to adopt standards more closely identical to the interconnection documents filed in North Carolina and approved by the North Carolina Utilities Commission in 2005. North Carolina's standards differ from my understanding of the proposed South Carolina standards in that our neighbor to the north also allows interconnection of single-phase renewable-energy systems up to 20 kilowatts (kW) in capacity for residential customers.

Sincerely,

J. Scott Johnston, AIA
